SALE OBJECTIVES: (Regeneration Cut). Most of the overstory will be removed to release good quality pole hardwoods and to regenerate aspen on the wetter soils. Land was recently purchased and some of older aspen clones died 4-8 years ago. Much of the remaining aspen needs to be cut in the near term or else the wetter soils with aspen will convert to hazelbrush, red maple, and ash.

Access & Terrain- Direct access via an Oneida County woods road going north from the corner of N. Turcott Rd and Forest Crop Rd. Leads up to the timber sale area. The site slopes from well-drained soils on the south end to somewhat poorly drained soils on the northern half of the sale. Skid distances are very short. Soils are loamy and will not drain quickly after rain.

OTHER SALE REQUIREMENTS AND CONDITIONS:

- The BCPL can restrict the type of equipment used on the job if conditions or damage warrant.
- BMP's (see Field Manual PUB-FR-093-2010) are mandatory for this sale.
- Notify the BCPL (715-277-3366) before you start the job.
- Bolts are sold together with pulpwood as woods-run pulpwood.
- Woods roads are wet in the spring and won't dry until July in most years. Please do not leave ruts in the Oneida County or BCPL portions of the roads. Use an ATV or walk in to the site currently because the access road is wet.
- The site has invasive Asian honeysuckle species. Wash your equipment before you moving to the next logging job to reduce the chances of spreading the seeds.
