SALE OBJECTIVES: The harvest objective is to maintain a multi-aged stand of high-quality hardwood timber by carefully managing existing crop trees and releasing saplings that are becoming suppressed. Single-tree selection is used to release crop trees and to limit the area in large gaps which can convert in to berry bushes. Marking removed suppressed, poor- quality trees, prime veneer and mature sawlogs. Yellow birch and basswood have a high proportion of grade 1 logs, some veneer, while sugar maple has some grade 1 but with most of the rest in grade 2.

Access & Terrain- Site can be reached by coming up from Hwy G and taking graveled logging roads. **The logging roads coming off the esker in Section 5 will be fixed and in good condition for hauling so access will be greatly improved.** Terrain is rolling hills. Soils are silt loam and with some wet swales. The logging roads do not drain quickly. Skid distances are very short.
